### APPLICATION:

It is widely used in mail room, post office, bank, book store, department store., etc. TZ-888 offers uniform, secure banding of various small-sized articles such as loose banknote, vouchers, parcels, pouch of mail, ten bundle of currency, posters, booklet, business cards box, to die cut labels. The TZ-888 uses white or brown paper tape with heat seal adhesive to ensure a tight seal without leaving a stain or residue on the bundled products. And clear cast polypropylene tape can heat seal to bundle pharmaceuticals, food packages, lottery tickets or anything for which a clear band is desirable. Each machine is calibrated for single width of tape, and features a patented mechanism for smooth tape feeding and taping.

Several time faster than hand banding (up to 25 cycles per minute), the unit requires very little table space. It can horizontal and vertical banding currency. Successful development and manufacture of this machine has completely changed the current traditional method of binding bank-notes clumsily and slowly by hand and realized binding bank-notes full-automatically and quickly with paper tape.
